RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA Airs
ENCO Workorder(s): AE02772

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, April 16, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
TO-15	OVGCMS7

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Manual integrations were performed on samples associated with TO-15. All data & explanations are included in the raw data section of the report.

Acetone is a common laboratory contaminant.

Affected Samples: 1D20052-BLK1, CRCA-AMB-20210414[AE02772-01], CRCA-VMP01-20210414[AE02772-02], CRCA-VMP03-20210414[AE02772-04], CRCA-VMP04-20210414[AE02772-05]
The method blank had a positive result for the acetone; however, the concentration in the method blank is less than 10% of the sample result.

Affected Samples: 1D20052-BLK1, CRCA-VMP02-20210414[AE02772-03]
Result for acetone may be biased high due to positive results in the associated method blank.

Affected Samples: AA65685-SCV1
Recovery for trans-1,3-dichloropropane was outside acceptance limits. Analyte was not detected in the samples.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
O-01	This compound is a common laboratory contaminant.
QB-01	The method blank had a positive result for the analyte; however, the concentration in the method blank is less than 10% of the sample result. There is minimal impact to the data.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☑ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Instrument ID:	OVGCMS7
Sequence/Batch ID:	AA65685 / 1001012
Data File Prefix:	217CZ ~~4/01/21~~ to 4/2/21

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA Airs
ENCO Workorder(s): AE02772

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, April 16, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

SDG: AE02772-TE016

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
TO-15	OVGCMS7

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Manual integrations were performed on samples associated with TO-15. All data & explanations are included in the raw data section of the report.

Acetone is a common laboratory contaminant.

Affected Samples: 1D20052-BLK1, CRCA-AMB-20210414[AE02772-01], CRCA-VMP01-20210414[AE02772-02], CRCA-VMP03-20210414[AE02772-04], CRCA-VMP04-20210414[AE02772-05]
The method blank had a positive result for the acetone; however, the concentration in the method blank is less than 10% of the sample result.

Affected Samples: 1D20052-BLK1, CRCA-VMP02-20210414[AE02772-03]
Result for acetone may be biased high due to positive results in the associated method blank.

Affected Samples: AA65685-SCV1
Recovery for trans-1,3-dichloropropane was outside acceptance limits. Analyte was not detected in the samples.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
O-01	This compound is a common laboratory contaminant.
QB-01	The method blank had a positive result for the analyte; however, the concentration in the method blank is less than 10% of the sample result. There is minimal impact to the data.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA Airs
ENCO Workorder(s): AE02772

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, April 16, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
O-01	This compound is a common laboratory contaminant.
QB-01	The method blank had a positive result for the analyte; however, the concentration in the method blank is less than 10% of the sample result. There is minimal impact to the data.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA Airs
ENCO Workorder(s): AE05482

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Tuesday, July 27, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AE05483

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Tuesday, July 27, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-12	Precision between duplicate samples was outside acceptance limits.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AD07081

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Wednesday, October 21, 2020.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Client PM: Alex Murphy
Project Number: 112G08970
ENCO Project ID: AD07081
SDG: AD07081-TE016

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
EPA 8260D / 5030B_MS	OVGCMS5
TO-15	OVGCMS7
RSK-175	OVGCFID2

Analysis: EPA 8260D

Manual integrations were performed on samples associated with EPA 8260D. All data & explanations are included in the raw data section of the report.

Affected Samples: AA63152-CCV1, CRCA-MW0019-058.0-20201020[AD07081-02],
The associated calibration verification standard for 1,2,4-trichlorobenzene, 1,2-dichloroethane, and dichlorodifluoromethane exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: 0J23034-MS1, 0J23034-MSD1
Precision between duplicate matrix spikes of the same sample was outside acceptance limits for 1,2-dibromo-3-chloropropane.

Affected Samples: 0J23034-MS1, 0J23034-MSD1
Matrix spike recovery was outside acceptance limits for methyl acetate.

Affected Samples: AA63152-CCV1
The continuing calibration verification standard exhibited low bias for multiple analytes; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: AA62152-SCV1
Recovery for bromomethane and dichlorodifluoromethane was outside acceptance limits. Analyte(s) was not detected in the samples.

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Methylene chloride is a common laboratory contaminant.

Affected Samples: CRCA-VMP03-20201020[AD07081-01]
Sample analyzed at a dilution due to high non-target analytes.

Analysis: TO-15

Affected Samples: 0J22033-BS1, 0J22033-BSD1, CRCA-VMP03-20201020[AD07081-01], CRCA-AMB-20201015[AD07081-03]
The associated laboratory control sample exhibited high bias for multiple analytes. Analytes were not detected in the sample.

Affected Samples: 0J22033-BS1, 0J22033-BSD1, CRCA-VMP03-20201020[AD07081-01], CRCA-AMB-20201015[AD07081-03]
The laboratory control sample (LCS) exhibited low bias for carbon tetrachloride. Analyte(s) was not detected in the sample.

Affected Samples: 0J22033-BLK1, CRCA-VMP03-20201020[AD07081-01], CRCA-AMB-20201015[AD07081-03]
Result may be biased high for methylene chloride due to positive results in the method blank.

Affected Samples: AA63124-CCV1, CRCA-VMP03-20201020[AD07081-01], CRCA-AMB-20201015[AD07081-03]
The associated calibration verification standard exhibited high bias for hexachlorobutadiene. Analytes were not detected in the sample

---

Analysis: RSK-175

Manual integrations were performed on samples associated with RSK-175. All data & explanations are included in the raw data section of the report.

Affected Samples: CRCA-MW0019-058.0-20201020[AD07081-02]
Initial result for methane was over the calibration range of the instrument. Sample was reanalyzed at a dilution.

Affected Samples: 0J22022-DUP1
Precision between duplicate samples was outside acceptance limits for methane.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
J-06	The associated laboratory control sample exhibited low bias; the reported result should be considered to be a minimum estimate.
O-01	This compound is a common laboratory contaminant.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-12	Precision between duplicate samples was outside acceptance limits.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.
R-05	The sample was diluted due to the presence of high levels of non-target analytes resulting in elevated reporting limits.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

I Lori S. Mangrum, as the designated Quality Assurance Officer, hereby attest that all electronic deliverables have been thoroughly reviewed and are in agreement with the associated hardcopy data. The enclosed electronic files have been reviewed for accuracy (including significant figures), completeness and format. The laboratory will be responsible for any labor time necessary to correct enclosed electronic deliverables that have been found to be in error. I can be reached at (407) 826-5314 if there are any questions or problems with the enclosed electronic deliverables.

Subject: RE: Microbial Insights permission to publish

Hi Alex,

Thank you for confirming. Please accept this email as permission from Microbial Insights to publish the lab data provided by Microbial Insights.

Happy Thanksgiving!

Kind Regards,
Casey

Casey Brown

Microbial Insights is a certified Woman Owned Small Business (WOSB).

Please remember to plan your sampling events around our holiday schedule:
Thanksgiving: Closed Thursday, November 26th thru Sunday, November 29th.
Christmas: Closed Friday, December 25th thru Sunday, December 27th.
New Year's: Closed Friday, January 1st thru Sunday, January 3rd.

Please note we will not have arrangements for Saturday pickups during these holidays. In order to maintain sample integrity and holding times please avoid shipment of samples to our location on these holidays. If you have any questions or concerns, please feel free to contact us.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AD06767

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, October 16, 2020.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
J-06	The associated laboratory control sample exhibited low bias; the reported result should be considered to be a minimum estimate.
O-01	This compound is a common laboratory contaminant.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-12	Precision between duplicate samples was outside acceptance limits.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AE00066

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Thursday, January 21, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Ethene	0.00510	U	0.00600	mg/L		0.00510 U				30	
Methane	0.442		0.00500	mg/L		0.152			98	30	QM-12

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
O-01	This compound is a common laboratory contaminant.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-12	Precision between duplicate samples was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.
R-05	The sample was diluted due to the presence of high levels of non-target analytes resulting in elevated reporting limits.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AE00066

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Thursday, January 21, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
EPA 8260D / 5030B_MS	OVGCMS2, OVGCMS5
TO-15	OVGCMS7
RSK-175	OVGCFID2

Analysis: EPA 8260D

Manual integrations were performed on samples associated with EPA 8260D. All data & explanations are included in the raw data section of the report.

Affected Samples: 1A25020-BS1, CRCA-MW0030-058.0-20210119[AE00066-01], CRCA-MW0029-035.0-20210119[AE00066-02], CRCA-MW0028-058.0-20210119[AE00066-03], CRCA-MW0027-035.0-20210119[AE00066-04], CRCA-MW0015-027.5-20210119[AE00066-05], CRCA-MW0013-027.5-20210119[AE00066-06], CRCA-MW0012-027.5-20210119[AE00066-07], CRCA-MW0002-032.5-20210119[AE00066-08], CRCA-MW0031-058.0-20210120[AE00066-09], CRCA-MW0032-058.0-20210120[AE00066-10], CRCA-MW0019-058.0-20210120[AE00066-12]
The associated laboratory control sample exhibited low bias for methyl acetate; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: CRCA-MW0032-058.0-20210120[AE00066-10], 1A25020-MS1, 1A25020-MSD1
Matrix spike recovery was outside acceptance limits for m,p-xylenes, methyl acetate, and/or styrene.

Affected Samples: 1A26010-BS1, CRCA-MW0018-058.0-20210120[AE00066-11RE1]
The associated laboratory control sample for multiple analytes exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: AA64658-CCV1, CRCA-MW0018-058.0-20210120[AE00066-11RE1]
The associated calibration verification standard for methyl acetate exhibited high bias. Analyte(s) not detected in the sample

Affected Samples: CRCA-MW0018-058.0-20210120[AE00066-11]
Sample was analyzed at a dilution due to suspected matrix interference.

Affected Samples: CRCA-MW0018-058.0-20210120[AE00066-11]
Initial analysis was over diluted. Sample was reanalyzed at a lower dilution.

Affected Samples: 1A26010-MS1, 1A26010-MSD1
Matrix spike recovery was outside acceptance limits for carbon disulfide, cyclohexane, and/or methyl acetate.

Analysis: EPA 8260D

Affected Samples: AA64632-CCV1, AA64658-CCV1
The continuing calibration verification standard exhibited low bias for multiple analytes; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Methylene chloride is a common laboratory contaminant.

Affected Samples: 1A25023-BLK1, CRCA-VMP01-20210120[AE00066-13RE1], CRCA-VMP02-20210120[AE00066-14], CRCA-VMP03-20210120[AE00066-15RE1], CRCA-SYSAIR-20210120[AE00066-17]
Result for methylene chloride may be biased high due to positive results in the associated method blank.

Affected Samples: CRCA-VMP01-20210120[AE00066-13], CRCA-VMP03-20210120[AE00066-15], CRCA-VMP04-20210120[AE00066-16]
Sample was analyzed at a dilution due to suspected matrix interference.

Affected Samples: CRCA-VMP01-20210120[AE00066-13], CRCA-VMP03-20210120[AE00066-15], CRCA-VMP04-20210120[AE00066-16],
Initial analysis was over diluted. Sample was reanalyzed at a lower dilution.

Affected Samples: CRCA-VMP04-20210120[AE00066-16RE1]
Sample was analyzed at a dilution due to the presence of high non-target analytes.

Affected Samples: AA64317-SCV1
SCV recovery for trans-1,3-dichloropropene was outside acceptance limits. Analyte was not detected in the samples.

Analysis: RSK-175

Manual integrations were performed on samples associated with RSK-175. All data & explanations are included in the raw data section of the report.

Affected Samples: CRCA-MW0031-058.0-20210120[AE00066-09],
CRCA-MW0018-058.0-20210120[AE00066-11], CRCA-MW0019-058.0-20210120[AE00066-12]
The associated calibration verification standard for ethane exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: CRCA-MW0031-058.0-20210120[AE00066-09], 1A26006-DUP1
Precision between duplicate samples was outside acceptance limits for methane.

Affected Samples: AA64653-CCV2, CRCA-MW0018-058.0-20210120[AE00066-11]
Initial result for methane was above the calibration range of the instrument. Sample was reanalyzed at a dilution.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
O-01	This compound is a common laboratory contaminant.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-12	Precision between duplicate samples was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.
R-05	The sample was diluted due to the presence of high levels of non-target analytes resulting in elevated reporting limits.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

Anticipated ***(Estimated)*** Completion Date: 28-Jan-21 19:00

This is an automated notification from our laboratory information management system (LIMS), indicating the samples we have recently received and their associated analyses. Should any of the following information be in error, please contact us immediately.

Thank you for choosing Environmental Conservation Laboratories. Should any events occur that delay the processing of your samples or inhibit our ability to complete the project within the projected time frame you will be contacted.

Sincerely,

Kaitlin Dylnicki

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

(1) Before solvent extraction proceeds, verify that there is no residual chlorine above 0.5 mg/L. Any sample above this must be treated to remove excess chlorine before extraction, and this documented as a comment.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☑ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☑ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Instrument ID:	OVGCFID2

RE: Laboratory Results for
Project Number: 112G08970, Project Name/Desc: NASA KSC CRCA
ENCO Workorder(s): AE00066

Dear Alex Murphy,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Thursday, January 21, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

SDG: AE00066-TE016

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
EPA 8260D / 5030B_MS	OVGCMS2, OVGCMS5
TO-15	OVGCMS7
RSK-175	OVGCFID2

Analysis: EPA 8260D

Manual integrations were performed on samples associated with EPA 8260D. All data & explanations are included in the raw data section of the report.

Affected Samples: 1A25020-BS1, CRCA-MW0030-058.0-20210119[AE00066-01], CRCA-MW0029-035.0-20210119[AE00066-02], CRCA-MW0028-058.0-20210119[AE00066-03], CRCA-MW0027-035.0-20210119[AE00066-04], CRCA-MW0015-027.5-20210119[AE00066-05], CRCA-MW0013-027.5-20210119[AE00066-06], CRCA-MW0012-027.5-20210119[AE00066-07], CRCA-MW0002-032.5-20210119[AE00066-08], CRCA-MW0031-058.0-20210120[AE00066-09], CRCA-MW0032-058.0-20210120[AE00066-10], CRCA-MW0019-058.0-20210120[AE00066-12]
The associated laboratory control sample exhibited low bias for methyl acetate; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: CRCA-MW0032-058.0-20210120[AE00066-10], 1A25020-MS1, 1A25020-MSD1
Matrix spike recovery was outside acceptance limits for m,p-xylenes, methyl acetate, and/or styrene.

Affected Samples: 1A26010-BS1, CRCA-MW0018-058.0-20210120[AE00066-11RE1]
The associated laboratory control sample for multiple analytes exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: AA64658-CCV1, CRCA-MW0018-058.0-20210120[AE00066-11RE1]
The associated calibration verification standard for methyl acetate exhibited high bias. Analyte(s) not detected in the sample

Affected Samples: CRCA-MW0018-058.0-20210120[AE00066-11]
Sample was analyzed at a dilution due to suspected matrix interference.

Affected Samples: CRCA-MW0018-058.0-20210120[AE00066-11]
Initial analysis was over diluted. Sample was reanalyzed at a lower dilution.

Affected Samples: 1A26010-MS1, 1A26010-MSD1
Matrix spike recovery was outside acceptance limits for carbon disulfide, cyclohexane, and/or methyl acetate.

Affected Samples: AA64632-CCV1, AA64658-CCV1
The continuing calibration verification standard exhibited low bias for multiple analytes; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Methylene chloride is a common laboratory contaminant.

Affected Samples: 1A25023-BLK1, CRCA-VMP01-20210120[AE00066-13RE1], CRCA-VMP02-20210120[AE00066-14], CRCA-VMP03-20210120[AE00066-15RE1], CRCA-SYSAIR-20210120[AE00066-17]
Result for methylene chloride may be biased high due to positive results in the associated method blank.

Affected Samples: CRCA-VMP01-20210120[AE00066-13], CRCA-VMP03-20210120[AE00066-15], CRCA-VMP04-20210120[AE00066-16]
Sample was analyzed at a dilution due to suspected matrix interference.

Affected Samples: CRCA-VMP01-20210120[AE00066-13], CRCA-VMP03-20210120[AE00066-15], CRCA-VMP04-20210120[AE00066-16],
Initial analysis was over diluted. Sample was reanalyzed at a lower dilution.

Affected Samples: CRCA-VMP04-20210120[AE00066-16RE1]
Sample was analyzed at a dilution due to the presence of high non-target analytes.

Affected Samples: AA64317-SCV1
SCV recovery for trans-1,3-dichloropropene was outside acceptance limits. Analyte was not detected in the samples.

Analysis: RSK-175

Manual integrations were performed on samples associated with RSK-175. All data & explanations are included in the raw data section of the report.

Affected Samples: CRCA-MW0031-058.0-20210120[AE00066-09], CRCA-MW0018-058.0-20210120[AE00066-11], CRCA-MW0019-058.0-20210120[AE00066-12]
The associated calibration verification standard for ethane exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: CRCA-MW0031-058.0-20210120[AE00066-09], 1A26006-DUP1
Precision between duplicate samples was outside acceptance limits for methane.

Affected Samples: AA64653-CCV2, CRCA-MW0018-058.0-20210120[AE00066-11]
Initial result for methane was above the calibration range of the instrument. Sample was reanalyzed at a dilution.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

ANALYTICAL RESULTS

Description: CRCA-VMP03-20210120 **Lab Sample ID:** AE00066-15 **Received:** 01/21/21 15:10

Matrix: Air **Sampled:** 01/20/21 11:15 **Work Order:** AE00066

Project: NASA KSC CRCA **Sampled By:** Melissa Bennett **% Solids:**

Volatile Organic Compounds by GCMS

^ - ENCO Orlando certified analyte [NELAC E83182]
